Will YOU be a CURE journal club facilitator this summer?
A (low-time commitment) opportunity for postdoctoral fellows and graduate students to build teaching and mentoring skills

The CURE Program at Dana-Farber/Harvard Cancer Center is gearing up for another summer of research, mentoring, and diving into the literature.

We need your help in empowering and engaging our high school and summer students in meaningful discussions of scientific concepts and techniques.

Details
- Weekly, 90-minute meetings
- Undergraduate journal club: week of June 3 to the week of August 5
- High school journal club: week of June 24 to the week of August 5.
- Mandatory Facilitator Orientation: May 22, 3-5pm
- Paper selections range from basic science to computational science to public health and nursing science.
- Familiarity with cancer literature is a positive but not required
- Can be counted for teaching credit
- 4-6 students and 2 journal club facilitators per section.

We provide the papers, students, and space.
You provide the scientific expertise and support.
