Guidance & Tools for Annual Individual Development Planning

The Individual Development Plan (IDP) is a mentoring tool that links research goals with career development and progress towards independence. It is meant to foster an ongoing and recurring discussion that involves evaluation, goal setting and feedback with input from both postdoc and their faculty mentor. While the NIH and NSF require the use of IDPs for graduate students and postdoctoral researchers supported by NIH awards, HMS and HSDM strongly recommend its implementation for all postdoctoral fellows, regardless of funding source.

The following IDP template provides an open framework that can facilitate an annual planning meeting between the postdoc and faculty mentor that addresses research and professional progress. This document should be filled out by both parties beforehand and discussed during the meeting, eventually coming to consensus on next steps.

Section I outlines major topics of discussion, benchmarks advancement, and identifies real or potential barriers to success along the training path. The Feedback element allows for the faculty mentor to evaluate trainee performance and progress while at the same time letting the postdoc share issues related to research, training, or mentoring.

Section II is a calendar for the upcoming year that allows for research and career development goals to be outlined and organized.

**Step 1:** Postdoc and Faculty Mentor should complete Sections I & II separately. The postdoc should provide this form with an updated CV to the mentor in advance of scheduling the meeting.

**Step 2:** Meet and discuss Sections I & II; review accomplishments, goals, barriers, and feedback. Begin outlining an agreed upon action plan towards making progress and meeting stated goals and objectives in the future.

**Step 3:** Implement action plan, review progress, and revise as needed.

*These guidelines and template are provided as an example that can be used in an Individual Development Plan or modified to suit individual needs. For further guidance, we recommend reading Vincent et al. Yearly planning meetings: individualized development plans aren't just more paperwork. Mol Cell. 2015 Jun 4;58(5):718-21.*
