

Celebrating Postdoc Achievements

National Postdoc Appreciation Week – September 20-24, 2021

Supriya Jagga
Department of Medicine
Division of Endocrinology
Brigham and Women's Hospital

Published research articles titled, “Impaired 1,25 dihydroxyvitamin D3 action and hypophosphatemia underlie the altered lacuno-canalicular remodeling observed in the Hyp mouse model of XLH” in Plos One
&
“Sclerostin-mediated impaired osteogenesis by fibroblast-like synoviocyte in the particle-induced osteolysis model” in Frontiers in Molecular Biosciences

Awarded Young Investigator Award by American Society for Bone and Mineral Research (ASBMR) for 2021
