# Postdoctoral Fellowship in Labs of Cognitive Neuroscience, Boston Children's Hospital/Harvard School of Medicine (Anne Arnett, Ph.D.)

The Arnett Lab within the Laboratories of Cognitive Neuroscience is seeking a highly qualified clinical psychology or school psychology postdoctoral fellow with an interest in assessment and treatment of children with neurodevelopmental disorders. Dr. Arnett and her research team aim to improve precision medicine care for children and families affected by attention deficit hyperactivity disorder (ADHD) and related neurodevelopmental symptoms. The fellow will have opportunities to engage in several studies utilizing various methodological approaches (e.g., clinical research, genetics, EEG, behavioral). Eligible postdocs should have training in clinical psychology or school psychology and prior experience working with children and families. Ideal candidates will be highly motivated and independent clinical scientists with strong written communication as well as analytic/statistical skills.

**Required qualifications:**

- Doctoral degree in clinical psychology or school psychology
- Experience conducting research with children
- Excellent interpersonal, clinical, writing, and research skills

**Preferred qualifications:**

- Experience or strong interest in mastering EEG methodology, including EEG acquisition, resting state, and event-related potentials.
- Prior involvement in clinical trials research.
- Experience with behavioral data and video coding.
- Programming experience, with a strong preference for familiarity with RStudio, MATLAB, and/or Python environments.
- Spanish speaking.

Additional expectations include supervising and mentoring research coordinators/assistants and undergraduate students, leading data processing and analysis, and correspondingly, involvement in manuscript preparation and grant writing.

A 2-year commitment is preferred; the second year offer is contingent upon available funding and performance during year 1. Applications will be accepted until the position is filled.

**Application Information**

A complete application includes **1 copy of each** of the following items (please include your full name on every page of your application):

1. Letter of interest
2. CV
3. Names and contact information for three references
4. De-identified neuropsychological or psychoeducational testing report written by you
5. Published or in-preparation manuscript (please describe/specify your contributions to the paper)

For consideration, please submit an application here

**Pay Transparency:**
Exempt Role: 70,000-77,267, depending on PGY level and experience.
The posted pay range is Boston Children's reasonable and good-faith expectation for this pay at the time of posting.

Pay offer provided depends on skills, experience, education, certifications, and a variety of other job-related factors.

BCH offers a comprehensive benefits package that includes flexible schedules, medical/vision/dental coverage, child-care and student-loan subsidies, generous paid time off, a 403(b) retirement plan, commuter and other employee discounts.
Boston Children's Hospital requires influenza vaccination for all employees, unless eligible for a medical or religious exemption.

Boston Children's Hospital is an Equal Opportunity/Affirmative Action Employer; all qualified applicants will receive consideration without regard to race, color, religion, national origin, sex, sexual orientation, gender identity, protected veteran status, disability, or other protected status.
